

TEAM CONTRACT (Team 4)

Team Members

- 1) **Backend:** Sunmin Lee
 - 2) **Product and UX Lead:** Youssef Bouarada
 - 3) **Web Frontend Lead:** Peiyu Yao
 - 4) **Mobile App:** Wenfei Song
 - 5) **Scrum Master and Integration:** Tzu Yu Chang
 - 5) **Data & ML:** Adam Treanor
-

Team Procedures

1. Day, time, and place for regular team meetings:

Group catch-up meetings: Mondays, Wednesdays, and Fridays at 12:00 PM (Online).

Role-specific / Sub-team meetings: Scheduled autonomously by the involved members at their own discretion based on project needs (e.g., Backend syncing with Data team).

2. Preferred method of communication:

Primary Meetings: Online Google Meet room.

Daily Async Communication: WhatsApp group chat for quick updates, problem-solving, and general announcements.

3. Decision-making policy:

Majority vote.

To handle conflicts and ensure decisions are made explicitly, the team must hold a structured discussion before any vote. Each member is required to provide clear arguments and present their viewpoints to ensure all perspectives are evaluated. Decisions will not be made simply by raising hands. Once a final decision is reached, it must be explicitly documented in the meeting minutes.

Exception: For domain-specific technical or strategic decisions (e.g., finalizing backend architecture), the designated "Key Person" or Domain Lead (e.g., Backend Lead) MUST be present in the meeting to evaluate feasibility and hold the final decision-making authority.

4. Method for setting and following meeting agendas:

For Group Catch-ups: The Scrum Master (Tzu Yu Chang) is responsible for setting the agenda,

sending reminders, and ensuring the team follows the agenda during the meeting.

For Role-specific Meetings: The meeting initiator assumes all responsibilities for setting the agenda and keeping the discussion on track.

5. Method of record keeping:

All Google Meet sessions will be fully recorded.

After the meeting, the meeting initiator is responsible for inputting the audio/transcript into a Gen AI tool to generate a summary of key points and action items.

This finalized meeting minutes document must then be uploaded to the shared team Google Drive.

Team Expectations

Work Quality

1. Project standards:

High. All deliverables must meet strict professional standards. Code must be systematically tested and undergo formal peer code reviews before any integration. Documentation, reports, and presentations must be clearly formatted, logically structured, and cross-checked against project rubrics before final submission.

2. Strategies to fulfill these standards:

For code: All code submissions require a Pull Request (PR) and must strictly adhere to the collaborative guidelines outlined in the CONTRIBUTES.md file. Before merging into the main branch, the code must pass our GitHub Actions CI/CD automated pipeline to ensure tests are cleared, be free of merge conflicts, and be officially reviewed and approved by at least one other team member (preferably the specific Domain Lead).

For documents: Formal peer proofreading is required by at least one non-author team member. No major task is considered 'done' until these specific testing, CI/CD automated checks, reviewing, and proofreading procedures are completely cleared.

Team Participation

1. Strategies to ensure cooperation and equal distribution of tasks:

Utilize an agile task board (Jira) to visualize workload. The Scrum Master (Tzu Yu Chang) will monitor the board to ensure tasks are distributed fairly and reallocate them if someone is overwhelmed.

2. Strategies for encouraging/including ideas from all team members:

Active and Inclusive Facilitation: We will explicitly allocate time for every member to share their thoughts. To support non-native English speakers, we ensure a patient, fair, and respectful environment where all ideas are actively listened to, fully understood, and considered equally before decisions are made.

3. Strategies for keeping on task:

Strict Agenda Adherence, Time-Boxing, and the "Parking Lot": To prevent meetings from running over and keep discussions highly focused, we will implement strict time boxing.

Pre-meeting: The Scrum Master (for group catch-ups) or the Meeting Initiator (for role-specific meetings) is responsible for setting the agenda and establishing specific time limits (time boxes) for each topic.

During the meeting: The facilitator will actively enforce this schedule. To prevent the team from drifting off-topic, if a discussion exceeds its time limit or sparks an unrelated debate, the facilitator will gently intervene and redirect the conversation. These off-topic ideas will be immediately recorded into a shared 'Parking Lot' document for future review. This ensures every valuable idea is captured while guaranteeing the current meeting stays precisely on track.

4. Preferences for leadership:

Shared leadership with domain ownership. The Scrum Master facilitates the overall process and removes blockers, while Technical/Domain Leads take full charge and leadership of their respective areas of expertise.

Personal Accountability

1. Expected individual attendance, punctuality, and participation:

Outcome-driven approach: As long as a team member successfully completes their designated tasks on time and to the expected quality, strict meeting attendance is not rigidly enforced. Task completion and results take priority over basic attendance rules.

2. Expected level of responsibility for fulfilling assignments:

High ownership: Members are expected to manage their own time to meet deadlines. If a deadline is at risk, the member must notify the group at least 24 hours in advance so the team can adapt.

3. Expected level of communication:

Acknowledge important group messages within 12-24 hours. Proactively communicates any roadblocks or delays as soon as they arise.

4. Expected level of commitment to decisions and tasks:

"Disagree and commit": Members may debate passionately during discussions, but once a final decision is made (especially by the Domain Lead), everyone fully commits to executing it.

Consequences for Failing to Follow Procedures

1. First occurrence:

A private, respectful check-in by the Scrum Master to understand the underlying issue (e.g., personal issues, technical difficulties) and offer support or task reallocation. This will be handled in accordance with the UCD Dignity and Respect policy.

2. Repeated occurrences:

If a member consistently fails to deliver tasks without communication, the team will issue a formal written warning within the group chat. If there is still no improvement and it jeopardizes the project, the issue will be officially escalated to the Module Lecturer with documented evidence (meeting minutes and task board records).

Agreement

By signing below, I acknowledge that:

- a) I participated in formulating the standards, roles, and procedures as stated in this contract.
- b) I understand that I am obligated to abide by these terms and conditions.
- c) I understand that if I do not abide by these terms and conditions, I will suffer the consequences as stated in this contract.
